See art in a new way...

CODiART

- Art
- Robotics
- Artificial Vision
- Software
- Automation
- Coding and Traceability

The Company

Innovative and Benefit Start-Up born with the idea of having a significant positive impact on the social and environmental context, promoting culture, making it usable and accessible to all and allowing people to study and marvel at the most hidden and fascinating details of the art world, through an innovative patented System.

CODiART Station

- Digitises Gigapixel works
- Allows authentication
- It is a useful tool for analysis for restoration purposes
- It is equipped with software to encode and catalogue works
- Automatically generates Condition Report, Damage Detection Reports and Certificates of Authenticity

Goals

- Enhancing and preserving the cultural and artistic heritage strengthening the online presence
- Support restorers in the study and analysis of works
- Making the works of artists unique and inimitable works of artists through authentication
- Facilitating the digitisation and cataloguing of works
